

Advanced treatments

Biorevitalization and Collagen Induction

Face-€180

Neckline-€75

Biorevitalization is a treatment that acts biologically and globally on the causes and consequences of skin ageing. This is a technique of multiple injections performed in the superficial dermis.

Small amounts of a poly-revitalizing complex and vitamins, amino acids, coenzymes, antioxidants, minerals and hyaluronic acid, are injected.

Rejuvenate the cells making them more active, stimulates the fibroblast production, collagen and elastin consequently, minimizing wrinkles and giving the skin more brightness.

In a short term, the skin is restructured, becoming more dense and firm (proven in clinical trials).

Profhilo

Face -€300 ;Neck-€300

Profhilo is “a true breakthrough” in anti-ageing medicine, is used for skin remodelling and for treating skin laxity, not for just filling lines and wrinkles .

It delivers dramatic improvement in tissue quality, even in challenging areas, and is complementary to other aesthetic treatments and dermal filler procedures.

The formulation of HA with different molecular weights contained in Profhilo is based on a concept of Hydrolift® Action. This innovative approach is aimed at counteracting the physiological reduction of HA in the skin, restoring hydration, elasticity and skin tone, by associating, in a synergistic way, deep hydration with the mechanical action of lifting the skin.

Profilo diffuses within the tissue after injection and over the period of 4 weeks it stimulates 4 different types of collagen and elastin. Due to its high spread ability, only 5 injection points on each side of the face are needed, which means patients find the treatment much more comfortable.

It is indicated in areas affected by skin laxity such as the malar and submalar areas of the face – cheek and jowls. Since the launch, Profilol has proven to be much appreciated for its characteristics of safety, high spreadability and cohesivity (ability to stay together). These qualities have been shown to be very effective in areas typically considered difficult to treat with traditional injectable products such as the temples, forehead, hands, inner arms and neck to mention a few.

Patients can expect increased firmness, elasticity and an overall improved quality of the skin with the effects lasting six months.

Two treatment sessions are usually recommended initially, with a 1-month interval in between. Maintenance treatments are recommended after 6 months.

Redensity- Light Filling

Face and Neck - €300

Redensity [1], is a unique hyaluronic acid-based skin enhancer which prevents premature skin aging, restores skin density and maintains skin glow.

With high concentration of free hyaluronic acid (15mg/g with optimal spreading properties), a redensification dermo-restructuring complex, highly efficient and powerful antioxidants, minerals, vitamin and 8 amino acids selected for their pharmaceutical grade, non-allergenic properties and compatibility with hyaluronic acid, (antioxidants, Glutathione, N-Acetyl-L-Cysteine, Alpha Lipoic acid. Minerals: Zinc, Copper. Vitamin: B6. Amino acids: Arginine, Glycine, Lysine, Threonine, Proline, Isoleucine, Leucine, Valine.)

After the treatment the elasticity and firmness of the skin is improved,

the signs of fatigue attenuated, the skin becomes luminous, radiant, healthy and visibly rejuvenated.

Peel Treatments

Face – €135

Neckline – €75

Chemical Peels have been used for decades. They work by chemically removing the outermost layer of the skin . As an anti-ageing and age spots action, purifies, regenerates, revitalizes and normalizes the skin pigmentation levels. The result is an improvement in skin health, from the first session. Improves the skin elasticity, wrinkles and fine lines are reduced, pigmentation levels are normalized, the microcystic acne diminishes and the skin becomes smoother and radiant.

For best results are recommended 3-4 sessions.

Application of Botulinum Toxin

Face 1 Area-€200; 2 Areas-€300; 3 Areas-€350

Nefertiti Neck Lift -€350

Gummy smile-€200

Masseter to “slim” the face -€300

Botulinum toxin is used to relax the smaller muscular bundles which are adherent to the skin and whose repeated contraction, over the years, yields so-called 'wrinkles'.

It has a preventive effect of aging, particularly in wrinkles and sagging.

The results of botulinum toxin are excellent, providing a fresher face, by mitigating dynamic wrinkles and expression marks.

Excessive Sweating Treatment

Both armpits – €500

Excessive sweating can be caused by hot weather, stress and anxiety and can hugely affect an individual's day to day life. Having treatment to temporarily block the signals from the nerves that stimulate sweat glands via the administration of injectables into the affected areas can hugely improve self confidence levels. This treatment can be administered in just one or both armpits and should be performed on a six monthly basis.

Fillers

Face-€300/ syringe

Lips - €300/ syringe

Jawline Contouring – 2 syringes-€500; 3syringes-€600; 4syringes-€720; 5syringes-€800

The fillers act by increasing the volume of the tissue where they are placed. We use hyaluronic acid, in-fills, a substance naturally produced by the body, which makes it quite safe and biocompatible. The selection of the Filler to be used depends on the type, location and severity of the problem addressed and also the skin characteristics of each.

Fills provide a visible result immediately. They are indicated for the treatment of several types of wrinkles, depressions, wrinkles, furrows, increase the volume of lips and facial and jawline contour.

Biostimulation- Plasma Rich in Growth Factors

Face €350

Neck and Neckline €150

Hair From €350

Platelet-rich plasma (PRP) is an autologous preparation of platelets in concentrated plasma it is a rejuvenating method that use cells plasmatic proteins and growth factors's own to stimulate and potentiate the normal biological functions of tissues.

PRP has attracted attention in several medical fields because of its ability to promote wound healing.

Growth factors released from platelets may act on stem cells □

-Epidermal stem cells are responsible for everyday regeneration of the different layers of the epidermis. These stem cells are found in the basal layer of the epidermis. The PRP stimulates the collagen production, elastin and hyaluronic acid. Texture, wrinkles and improve skin tone, brightness and tensor effect naturally arise over the weeks following the treatment.

-Hair follicle stem cells ensure constant renewal of the hair follicles. They can also regenerate the epidermis and sebaceous glands if these tissues are damaged. Stimules the development of new follicles and promotes neovascularization. Reduces hair loss improves the hair volume, density and coverage, and stimulates growth.

Body

By Injection Treatment

Abdomen and Flanks – €110

Thighs and Buttocks – €150

Arms – €95

Submental Fat – €95

Protocols are customized to the needs and particularities of each person.

With excellent results:

- Elimination of cellulite, treating cellulite and the factors involved in their training;
- Elimination of localized fat (subcutaneous fat layer does not easily respond to diet and exercise);
- Elimination of cellulite, treating cellulite and the factors involved in their training
- Promotes Firmness and tone of the tissues;
- Reduces stretch marks and scars;
- Activates Blood microcirculation.

Beauty treatments

Facial

Skin cleansing

Face €90

Back €90

Products used are customized to the needs of each.

Deep skin cleansing with steam and careful manual extraction.
Refreshing and invigorating treatment for the skin.
